Cancer Letters, 43 (1988) 237—240
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 43

activation, tumor, cellular ongogenes, 37
aflatoxin B_1, butylated hydroxytoluene, DNA binding, glutathione *S*-transferase, liver and lung, 125
alpha satellite DNA, alphoid sequence, CDDP resistance, 219
alphoid sequence, alpha satellite DNA, CDDP resistance, 219
aminolevulinate synthase, heme, lymphocytes, malignant lymphoproliferative disorders, 43
ammonium chloride, trisodium nitrilotriacetate monohydrate, nitrilotriacetic acid, *N*-bis(2-hydroxypropyl) nitrosamine, urinary bladder carcinogenesis, rat, 105
angiogenic activity, mammary carcinoma, antiangiogenic activity, medroxyprogesterone acetate, antitumor activity, 85
antiangiogenic activity, angiogenic activity, mammary carcinoma, medroxyprogesterone acetate, antitumor activity, 85
antioxidant, butylated hydroxyanisole, butylated hydroxytoluene, dibutylnitrosamine, hepatocarcinogenesis, rat liver, 167
antitumor activity, angiogenic activity, mammary carcinoma, antiangiogenic activity, medroxyprogesterone acetate, 85
aromatic hydrocarbons, benzo[*f*]quinoline, aza-polynuclear, DNA adducts, bay-region diol epoxide, 133
asparaginase, asparagine, glutamine, renal carcinoma, 191
asparagine, asparaginase, glutamine, renal carcinoma, 191
attachment to glass, sialic acid content, mouse myeloma cells, B-cell hybridomas, capping, 79
autoradiography, selenite, selenoproteins, mammary epithelial cells, chemoprevention, 227
aza-arene, benzo[*f*]quinoline, phenanthrene, aza-polynuclear aromatic hydrocarbon, nitrogen heterocyclic, 197
aza-polynuclear, benzo[*f*]quinoline, aromatic hydrocarbons, DNA adducts, bay-region diol epoxide, 133
aza-polynuclear aromatic hydrocarbon, benzo[*f*]-quinoline, phenanthrene, aza-arene, nitrogen heterocyclic, 197
B-cell hybridomas, sialic acid content, mouse myeloma cells, attachment to glass, capping, 79
bay-region diol epoxide, benzo[*f*]quinoline, aza-polynuclear, aromatic hydrocarbons, DNA adducts, 133
benzo[*f*]quinoline, aza-polynuclear, aromatic hydrocarbons, DNA adducts, bay-region diol epoxide, 133
benzo[*f*]quinoline, phenanthrene, aza-polynuclear aromatic hydrocarbon, aza-arene, nitrogen heterocyclic, 197
brain tumors, sialic acid, subcellular localization, 29
butylated hydroxyanisole, antioxidant, butylated hydroxytoluene, dibutylnitrosamine, hepatocarcinogenesis, rat liver, 167
butylated hydroxytoluene, aflatoxin B_1, DNA binding, glutathione *S*-transferase, liver and lung, 125
butylated hydroxytoluene, antioxidant, butylated hydroxyanisole, dibutylnitrosamine, hepatocarcinogenesis, rat liver, 167

C3H mice, transplantable mammary adenocarcinoma, camphor, metronidazole, X-irradiation, 21
camphor, C3H mice, transplantable mammary adenocarcinoma, metronidazole, X-irradiation, 21
capping, sialic acid content, mouse myeloma cells, B-cell hybridomas, attachment to glass, 79
carcinoembryonic antigen, normal colon mucosa, glycolpiid membrane anchor, 151
carcinogenicity, polycyclic aromatic compounds, sidestream smoke, 173
carcinoma patients, prostate, hyperplasia, inhibin-like peptides, prostatic hyperplasia, 9
CDDP resistance, alpha satellite DNA, alphoid sequence, 219
cellular ongogenes, tumor, activation, 37
cell transformation, tumour promoters, papillomavirus, 93
cervical carcinogenesis (mouse), methylcholanthrene, 17β-estradiol, 73
cervical carcinogenesis in mice, 3-methylcholanthrene, indomethacin, 15
chelators, epirubicin, fibroblasts, free radicals, 179
chemoprevention, selenite, selenoproteins, mammary epithelial cells, autoradiography, 227

chlorobenzilate, enzyme altered foci, rat liver, 161
clofibrate, peroxisome proliferators, simfibrate, di(2-ethylhexyl)phthalate, renal promoter, *N*-ethyl-*N*-hydroxyethylnitrosamine, rat, 145
colon, growth factor, receptor, growth, epidermal growth factor, differentiation, 139
colonocyte primary culture, fiber, short-chain organic acids, 121
cytosine arabinoside, long-term toxicity, pulse dose treatment, 59

di(2-ethylhexyl)phthalate, peroxisome proliferators, clofibrate, simfibrate, renal promoter, *N*-ethyl-*N*-hydroxyethylnitrosamine, rat, 145
dibutylnitrosamine, antioxidant, butylated hydroxyanisole, butylated hydroxytoluene, hepatocarcinogenesis, rat liver, 167
diethylstilbestrol, neonatal/vaginal pathology, 207
differentiation, growth factor, receptor, colon, growth, epidermal growth factor, 139
DNA adducts, benzo[*f*]quinoline, aza-polynuclear, aromatic hydrocarbons, bay-region diol epoxide, 133
DNA binding, butylated hydroxytoluene, aflatoxin B_1, glutathione *S*-transferase, liver and lung, 125

endometrial cancer, progesterone, receptor, heterogeneity, fast protein liquid chromatography, 215
enzyme altered foci, chororbenzilate, rat liver, 161
epidermal growth factor, growth factor, receptor, colon, growth, differentiation, 139
epirubicin, chelators, fibroblasts, free radicals, 179
17β-estradiol, cervical carcinogenesis (mouse), methylcholanthrene, 73
N-ethyl-*N*-hydroxyethylnitrosamine, peroxisome proliferators, clofibrate, simfibrate, di(2-ethylhexyl)-phthalate, renal promoter, rat, 145

fast protein liquid chromatography, progesterone, receptor, endometrial cancer, heterogeneity, 215
fiber, colonocyte primary culture, short-chain organic acids, 121
fibroblasts, chelators, epirubicin, free radicals, 179
free radicals, chelators, epirubicin, fibroblasts, 179

galactosyltransferases, hepatocarcinogenesis, glycoproteins, 49
glutamine, asparaginase, asparagine, renal carcinoma, 191
γ-glutamyl transpeptidase, *N*-nitrosodiethanolamine, morphometrical analysis, 99
glutathione *S*-transferase, butylated hydroxytoluene, aflatoxin B_1, DNA binding, liver and lung, 125
glutathione *S*-transferase, heme binding Z protein, hepatocyte nodules and carcinomas, male Fischer rats, 55
glycolpiid membrane anchor, carcinoembryonic antigen, normal colon mucosa, 151
glycoproteins, galactosyltransferases, hepatocarcinogenesis, 49
growth, growth factor, receptor, colon, epidermal growth factor, differentiation, 139
growth factor, receptor, colon, growth, epidermal growth factor, differentiation, 139

heme, lymphocytes, malignant lymphoproliferative disorders, aminolevulinate synthase, 43
heme binding Z protein, hepatocyte nodules and carcinomas, glutathione *S*-transferase, male Fischer rats, 55
hepatocarcinogenesis, antioxidant, butylated hydroxyanisole, butylated hydroxytoluene, dibutylnitrosamine, rat liver, 167
hepatocarcinogenesis, galactosyltransferases, glycoproteins, 49
hepatocyte nodules and carcinomas, heme binding Z protein, glutathione *S*-transferase, male Fischer rats, 55
heterogeneity, progesterone, receptor, endometrial cancer, fast protein liquid chromatography, 215
hyperplasia, prostate, inhibin-like peptides, prostatic hyperplasia, carcinoma patients, 9
hyperthermia, thermosensitivity, renal cancer, renal tubular epithelium, monoclonal antibody, 1

indomethacin, cervical carcinogenesis in mice, 3-methylcholanthrene, 15
indomethacin, transplantable mouse mammary tumor metastasis, linoleate enhancement, prostaglandin E levels, 111
inhibin-like peptides, prostate, hyperplasia, prostatic hyperplasia, carcinoma patients, 9

linoleate enhancement, transplantable mouse mammary tumor metastasis, indomethacin, prostaglandin E levels, 111
liver and lung, butylated hydroxytoluene, aflatoxin B_1, DNA binding, glutathione *S*-transferase, 125
long-term toxicity, cytosine arabinoside, pulse dose treatment, 59
lymphocytes, heme, malignant lymphoproliferative disorders, aminolevulinate synthase, 43

male Fischer rats, heme binding Z protein, hepatocyte nodules and carcinomas, glutathione *S*-transferase, 55

malignant lymphoproliferative disorders, heme, lymphocytes, aminolevulinate synthase, 43
mammary carcinoma, angiogenic activity, antiangiogenic activity, medroxyprogesterone acetate, antitumor activity, 85
mammary epithelial cells, selenite, selenoproteins, autoradiography, chemoprevention, 227
medroxyprogesterone acetate, angiogenic activity, mammary carcinoma, antiangiogenic activity, antitumor activity, 85
metastatic patterns, tumour cells, mouse uterus, 33
methylcholanthrene, cervical carcinogenesis (mouse), 17β-estradiol, 73
3-methylcholanthrene, cervical carcinogenesis in mice, indomethacin, 15
metronidazole, C3H mice, transplantable mammary adenocarcinoma, camphor, X-irradiation, 21
monoclonal antibody, hyperthermia, thermosensitivity, renal cancer, renal tubular epithelium, 1
morphometrical analysis, *N*-nitrosodiethanolamine, γ-glutamyl transpeptidase, 99
mouse hepatocyte intercellular communication, phthalate monoesters, structure activity relationships, 65
mouse myeloma cells, sialic acid content, B-cell hybridomas, attachment to glass, capping, 79
mouse uterus, metastatic patterns, tumour cells, 33

N-bis(2-hydroxypropyl) nitrosamine, trisodium nitrilotriacetate monohydrate, nitrilotriacetic acid, ammonium chloride, urinary bladder carcinogenesis, rat, 105
neonatal/vaginal pathology, diethylstilbestrol, 207
nitrilotriacetic acid, trisodium nitrilotriacetate monohydrate, ammonium chloride, *N*-bis(2-hydroxypropyl) nitrosamine, urinary bladder carcinogenesis, rat, 105
nitrogen heterocyclic, benzo[*f*]quinoline, phenanthrene, aza-polynuclear aromatic hydrocarbon, aza-arene, 197
N-nitrosodiethanolamine, γ-glutamyl transpeptidase, morphometrical analysis, 99
normal colon mucosa, carcinoembryonic antigen, glycolpiid membrane anchor, 151

papillomavirus, tumour promoters, cell transformation, 93
peroxisome proliferators, clofibrate, simfibrate, di(2-ethylhexyl)phthalate, renal promoter, *N*-ethyl-*N*-hydroxyethylnitrosamine, rat, 145
phenanthrene, benzo[*f*]quinoline, aza-polynuclear aromatic hydrocarbon, aza-arene, nitrogen heterocyclic, 197
phthalate monoesters, mouse hepatocyte intercellular communication, structure activity relationships, 65
polycyclic aromatic compounds, carcinogenicity, sidestream smoke, 173
progesterone, receptor, endometrial cancer, heterogeneity, fast protein liquid chromatography, 215
prostaglandin E levels, transplantable mouse mammary tumor metastasis, linoleate enhancement, indomethacin, 111
prostate, hyperplasia, inhibin-like peptides, prostatic hyperplasia, carcinoma patients, 9
prostatic hyperplasia, prostate, hyperplasia, inhibin-like peptides, carcinoma patients, 9
proto-oncogenes, thyroid tumour tissue, 185
pulse dose treatment, long-term toxicity, cytosine arabinoside, 59

rat, peroxisome proliferators, clofibrate, simfibrate, di(2-ethylhexyl)phthalate, renal promoter, *N*-ethyl-*N*-hydroxyethylnitrosamine, 145
rat, trisodium nitrilotriacetate monohydrate, nitrilotriacetic acid, ammonium chloride, N-bis(2-hydroxypropyl) nitrosamine, urinary bladder carcinogenesis, 105
rat liver, antioxidant, butylated hydroxyanisole, butylated hydroxytoluene, dibutylnitrosamine, hepatocarcinogenesis, 167
rat liver, chlorobenzilate, enzyme altered foci, 161
receptor, growth factor, colon, growth, epidermal growth factor, differentiation, 139
receptor, progesterone, endometrial cancer, heterogeneity, fast protein liquid chromatography, 215
renal cancer, hyperthermia, thermosensitivity, renal tubular epithelium, monoclonal antibody, 1
renal carcinoma, asparaginase, asparagine, glutamine, 191
renal promoter, peroxisome proliferators, clofibrate, simfibrate, di(2-ethylhexyl)phthalate, *N*-ethyl-*N*-hydroxyethylnitrosamine, rat, 145
renal tubular epithelium, hyperthermia, thermosensitivity, renal cancer, monoclonal antibody, 1

selenite, selenoproteins, mammary epithelial cells, autoradiography, chemoprevention, 227
selenoproteins, selenite, mammary epithelial cells, autoradiography, chemoprevention, 227
short-chain organic acids, colonocyte primary culture, fiber, 121
sialic acid, brain tumors, subcellular localization, 29
sialic acid content, mouse myeloma cells, B-cell hybridomas, attachment to glass, capping, 79

sidestream smoke, polycyclic aromatic compounds, carcinogenicity, 173
simfibrate, peroxisome proliferators, clofibrate, di(2-ethylhexyl)phthalate, renal promoter, *N*-ethyl-*N*-hydroxyethylnitrosamine, rat, 145
structure activity relationships, mouse hepatocyte intercellular communication, phthalate monoesters, 65
subcellular localization, sialic acid, brain tumors, 29

thermosensitivity, hyperthermia, renal cancer, renal tubular epithelium, monoclonal antibody, 1
thyroid tumour tissue, proto-oncogenes, 185
transplantable mammary adenocarcinoma, C3H mice, camphor, metronidazole, X-irradiation, 21
transplantable mouse mammary tumor metastasis, linoleate enhancement, indomethacin, prostaglandin E levels, 111
trisodium nitrilotriacetate monohydrate, nitrilotriacetic acid, ammonium chloride, *N*-bis(2-hydroxypropyl) nitrosamine, urinary bladder carcinogenesis, rat, 105
tumor, cellular ongogenes, activation, 37
tumour cells, metastatic patterns, mouse uterus, 33
tumour promoters, papillomavirus, cell transformation, 93
urinary bladder carcinogenesis, trisodium nitrilotriacetate monohydrate, nitrilotriacetic acid, ammonium chloride, *N*-bis(2-hydroxypropyl) nitrosamine, rat, 105
X-irradiation, C3H mice, transplantable mammary adenocarcinoma, camphor, metronidazole, 21
